LinkedIn: Heydari-m | Portfolio

Senior software engineer with 8+ years of experience building SaaS products with PHP/Laravel and JavaScript. Experienced in full-stack delivery, API integrations, SQL optimization, testing and production support. Recent projects include a published Java/React app and a local Python/LLM voice-assistant prototype.

Skills: PHP • Laravel • JavaScript • REST APIs • SQL • MySQL • PostgreSQL • React • TypeScript • Node.js • Docker • Git • PHPUnit • CI/CD • Google Cloud • Grafana • Python • FastAPI

EXPERIENCE

Team Procure *Senior Software Engineer * Sep 2021 – Apr 2026*

A SaaS platform for managing procurement workflows, tenders, and purchasing operations.

- Owned delivery of the main procurement application, working with product management on priorities and implementing Laravel APIs and JavaScript/jQuery/Bootstrap interfaces.
- Integrated Stripe, QuickBooks, and Sage using OAuth-based workflows, and implemented asynchronous processing with queues and scheduled jobs.
- Proposed search-module improvements and made end-to-end table loading up to 2× faster through code, indexing, and frontend changes.
- Investigated production incidents and refactored legacy code, using GitHub Copilot for bug fixes and optimization; led a customer-facing stabilization project.
- Wrote PHPUnit tests and reviewed GitHub pull requests; responsible for code quality within a two-developer team in my final year.

Mahak Learning Group *Full Stack Developer * Oct 2019 - Aug 2020*

- Maintained frontend and backend as the sole developer; migrated the interface to Bootstrap.
- Replaced Flash-based video playback and added RTL media support for Farsi users.

KIMIA TEB *Software Developer * Apr 2019 - Oct 2019*

- Developed a Laravel clinic application and deployed it with Docker and Nginx on customer servers.
- Integrated insurance APIs to automate secure data exchange between clinics and external systems.

Galactic Travel *Backend Developer * May 2017 - Dec 2018*

- Built Laravel REST APIs integrating transportation providers for bookings and real-time availability.
- Extracted the communication system from the core application and rebuilt it with Node.js and Vue.js to relay customer requests to hotel staff in real time.

Royal Concert *Software Developer May 2015 - Nov 2016*

- Co-founded a startup and developed a concert and event ticketing platform using PHP, MySQL, and JavaScript, supporting online bookings and event management.

SELECTED PROJECTS

ArtikelSense *Sep 2026 - Present*

Java / Spring Boot | React / TypeScript | PostgreSQL | GitHub Actions | Google Cloud

An Android app published on Google Play for learning German noun articles through recognition patterns, practice, and quizzes.

- Developed its Java/Spring Boot backend and React/TypeScript frontend with Codex assistance.
- Built server-driven quiz and review flows with resumable sessions and idempotent answer submission to prevent duplicate progress updates.
- Used GitHub Actions for automated builds and tests; deployed the application manually to Google Cloud Compute Engine.

Turkish Voice AI Agent *Local prototype*

Python / FastAPI | Qwen3 / llama.cpp | Whisper | Silero VAD | FreyaTTS | GitHub

A local Turkish Voice AI Agent prototype for a real-estate office, using browser audio and sample property listings.

- Built a speech-to-speech pipeline combining Whisper transcription, local Qwen3 inference and optional FreyaTTS speech generation; exposed property search through FastAPI.
- Implemented a task-oriented dialogue flow with structured extraction, conversation state, candidate ranking and validation of follow-up questions against eligible fields.
- Added 18 lightweight Python and JavaScript checks for search, conversation rules and setup helpers, with GitHub Actions running them automatically.
- Created a native macOS setup script with verified model downloads and separate local environments; documented architecture, trade-offs and prototype limitations.

EDUCATION

Seraj University | Master of Software Engineering | 2015 - 2018

UCNA | Bachelor of Software Engineering | 2012 - 2015
